## CS110 / INDEPENDENCE ROAD

**Review status**

Calculated  awaiting instructor review

### Attention Accord plan

**mission**

The story would be about a security robot trying to watch over a warehouse environment, making sure to catch anyone that tries to sneak in a steal something.

**framework**

I would make the intro have a comic panel where the robot turns on and prepares their nightly shift of watching over the warehouse.

**pipeline**

Story goal  2026-11-10T12:45 to 2026-11-10T13:45 Pacific

Inputs / assets  2026-11-10T13:45 to 2026-11-10T14:45 Pacific

Build + configure  2026-11-10T14:45 to 2026-11-10T15:45 Pacific

Output / scene  2026-11-10T15:45 to 2026-11-10T16:45 Pacific

Test + handoff  owner Rueben  2026-11-10T16:45 to 2026-11-10T17:45 Pacific

This board shows a concept sketch of the robot design, as well as shows a concept sketch of a comic for the intro of the game.

**tech**

I would by using Unity given that it have a asset library, which would make it easier for me to add assets for the game project I would be making.

**Time code**

Classes & components

Class | Responsibility | GameObject

See what I can do to work on the game project. | Make sure to work on the project as much as possible. | work on what the environment should look like.

**communication**

Working agreements

Agreement | Owner / where recorded | Confirmed

I would work on my game and work on making the assets for said game project. | Rueben | [x]

**reuse**

I could use the website that my other team and I worked on and use it for the game project as part of the universe.

**boardNotes**

I could work on the design for the robot a little more and make it more flexible.

### Whiteboard

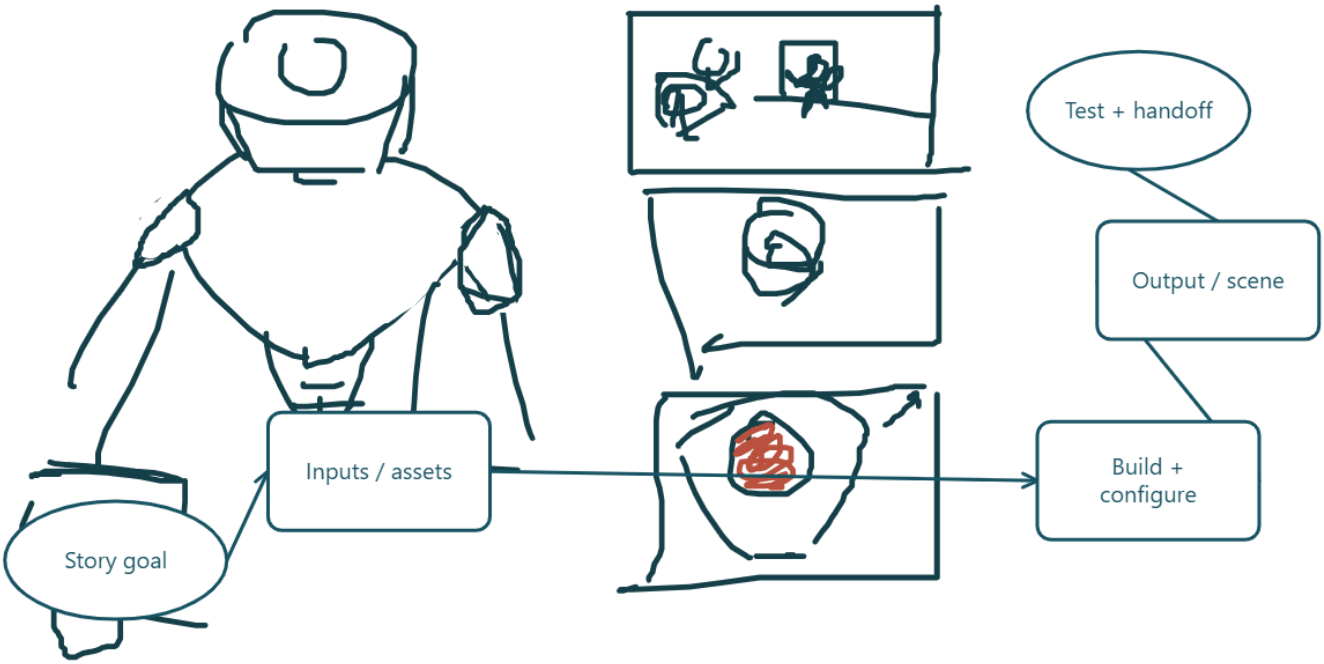

A list of things that should be included and referenced.

**CS110 / INDEPENDENCE ROAD**

## Whiteboard

This board shows a concept sketch of the robot design, as well as shows a concept sketch of a comic for the intro of the game.
