Git test: edit run/preview save commit push open remote. Record the test commit and result.

I created my personal repository for this week.

Instructor access and team Git readiness: what did you test? Solo: say solo.

Solo.

1 Introduction scan notes, one useful idea and one question

I observed that the video talks about what we are going to learn about throughout the rest of the other videos.

2 Developer mindset scan notes, one useful idea and one question

In Order to have the right mindset when developing a game, you have to be able to find creative ideas, have the perseverance to make the game, be able to adapt to making new games for the industry, be able to collab with other game developers, and being able to appeal to your customers with your games. One must have something to a growth mindset in order to create games, that way yo are able to not feel like you're forcefully making games without any sense of enjoyment. The video also talks about how to deal with obstacles.

3 Folders and project creation scan notes, one useful idea and one question

The video talks about how to organize your game project files and how to easily access them.

4 Documentation scan notes, one useful idea and one question

This video talks about how to

5 Introduction to Unity scan notes, one useful idea and one question

this video shows how to document your game project. As well as how to edit the document for said game project.

6 Import a custom player scan notes, one useful idea and one question

This video talks about how to import your own custom-made player character into your game project. It shows how to get the model for your character as well as how to put it into your game project.

Your interpretation: what can this pipeline contribute to a prior or new story?

My interpretation of how this pipeline contributes to a prior or new story is because it has to do with creation and making your story as you are working on your game project.

Questions to resolve before committing to a team or mission

I don't have any questions to ask at this moment in time.

Whiteboard

A diagram of what makes a game developer be motivated to create game projects.
